***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 2/23/04 has been entered.

2. Claims 1-12 have been canceled. Claims 13-24 have been added and are the only remaining claims presently active in the application.

3. In light of the amendment filed 2/23/04, the 35 USC 112 and 35 USC 103 rejections have been withdrawn.

***Allowable Subject Matter***

4. Claims 13-24 are allowed.

### *Drawings*

5. New corrected drawings are required in this application because the drawings are hard to read and reference markings are illegible (see Figs. 2, 3E and 4). Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

### *Reasons for Allowance*

6. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach or fairly suggest a method of increasing the surface area of a substrate comprising placing the substrate in an inert atmosphere having a pressure of between  $10^{-3}$  –  $10^{-2}$  Torr, introducing oxygen at a pressure of from one to two orders of magnitude less than the inert pressure and evaporating at least one valve metal to form a coating having the at least one valve metal and the at least one valve metal oxide.

The prior art teaches forming the coating with pressures outside of the claimed ranges. The instant invention details that the order of magnitude of oxygen pressure being one or two less than that of the inert pressure is critical within the claimed range.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian K Talbot whose telephone number is (571) 272-1428. The examiner can normally be reached on Monday-Friday 6AM-3PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Shrive P Beck can be reached on (571) 272-1415. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
